# INTRODUCTION

## TO THE

# CHRONOLOGICAL TABLES.

PUBLISHED IN 1835, BY MR. J. F. M. REID.

---

IN Bengal, the Bengalee year, where no specific mention of another era is made, is understood to be intended ; in Orissa, the Willaity. They are used respectively in the collection of the Government revenue, and in transactions between individuals, in those provinces.

The Fuslee and Sumbut years are, in like manner, current in the provinces of Behar and Benares, and in the ceded and conquered provinces. The Government revenue is collected by the Fuslee year ; and the common transactions of life are, as regards the period of their occurrence, regulated by it. The Sumbut year is chiefly used by native merchants and bankers.

The Hijree year obtains, generally, throughout the provinces, in a greater or less degree, as the local community may or may not consist of Mahomedans ; to transactions amongst whom it may be said to be exclusively confined.

The Bengalee and Willaity are solar ; the Fuslee and Sumbut, lunar years ; and the calculations, in all, accord with the principles of the Hindoo Astronomy. The days of the month of the three first-mentioned styles are reckoned in consecutive order ; so that the first day being found in the tables, the subsequent dates can be easily ascertained. In the Sumbut, however, the date cannot be ascertained if not given in the tables, in consequence of dates being expunged and repeated, as will be hereafter explained.

The Hindoo solar year consists of 365 days, 15 ghurrees, 80 puls, and 22½ bepuls\*; and is divided into 12 months, each commencing from the moment the sun enters a new sign of the zodiac. The following table shows how far the months coincide with the English months, and the sign of the zodiac in which the sun is during each month.

1 Bysakh,	Corresponding with the last part of	April,	and the first part of	May	The sun is in the sign of the Hindoo zodiac.	Mek'h,	Corresponding with the Latin signs	Aries
2 Jhyt		May,		June		Brik'h,		Taurus
3 Assar,		June,		July		Mit 155n,		Gemini
4 Sawun,		July,		August		Kurk,		Cancer
5 Bhadoon,		August,		September		Sing,		Leo
6 Assun or Kuwar,		September,		October		Kunnya,		Virgo
7 Kartick,		October,		November		Toola,		Libra
8 Ughun,		November,		December		Briset ik,		Scorpio
9 Pooa		December,		January		Dilun,		Sagittarius
10 Magh,		January,		February		Mukur,		Capricornus
11 Phagoon,		February,		March		Kumbh,		Aquarius
12 Chyt,		March,		April		Meen,		Pisces

The Bengalee year commences on the 1st of Bysakh; the Willaity on the 1st of Assun.

The Hindoo lunar year is shorter than the solar by 10 days, 53 ghurrees, 20 puls, and 22½ bepuls. This difference, in two solar years eight months and 15 days, amounts to one month. In the year in which it attains to this, viz. that in which two conjunctions occur while the sun is in the same sign, the second month is called by the same name as the preceding, and is denominated *Lound*, or *Udhl*, or intercalary. No religious festivals occur in this month. The intercalations occur from Chyt to Assun, both inclusive.

The Fuslee year commences on the 1st of Assun, (called also in the Western Provinces Kuwar) the Sumbut year, with the first day of the *Soodee Puk'h*, or second or bright semi-lunation of Chyt.

The Fuslee and Sumbut months correspond in name and duration of time, and commencing on the day after the full moon, extend to the full moon following. The days of the Fuslee month are reckoned, as before stated, in consecutive order those of the Sumbut are governed by the following principles.

The month is divided into 30 equal parts or *Til'hs*, and again into two *Puk'hs*, or semi-lunations, each consisting of 15 *Til'hs*. The first semi-lunation commencing on the day after the full moon (*Poorunmashee*),

- 
- \* 60 Tils or Unoopuls = 1 Bepul
  - 60 Bepuls, = 1 Pul
  - 60 Puls = 1 Ghurree or Dund
  - 60 Ghurrees = 1 Natural Day and Night

ends with the new moon (*Umaissa*), and is called the *Budee Puk'h*, or dark semi lunation: the second commences on the day after the *Umaissa*, and ends with the *Poorunnashee*, and is denominated the *Soodee Puk'h*, or bright semi lunation

The civil or Fuslee month consists of from 28 to 30 days. the *Til'hs*, therefore, of a month of 30 days, will be each longer than those of a month of 28 or 29 days, and, as the Hindoo civil day embraces the period between sun-rise and sun rise, a day will occasionally occur in which two *Til'hs* will expire. Sometimes again no *Til'h* will expire during the course of the day. In the first instance, the second *Til'h* will be expunged, the day invariably taking its name from the first *Til'h* which ends during the course of it e.g. the first *Til'h* expires just after sun rise of the first day of Poos Fuslee, the second, before sun-rise of the second day of Poos Fuslee, the third, during the course of the second of Poos Fuslee then\* the first day of Poos Fuslee will be called Poos *Budee Purwa*, the second Poos Fuslee Poos *Budee Teej* (the second *Til'h* being expunged), the third Poos Fuslee, Poos *Budee Chouthee*, and so on. In the second instance, the day in which no *Til'h* expires will be called by the same number as the preceding day e.g. the first *Til'h* expires about the close of the first, or exactly at, or a little before, sun rise of the second Fuslee day, and the second, just after sun rise of the third Fuslee day, then† the first Fuslee day will be denominated Poos *Budee Purwa*, the second also Poos *Budee Purwa*, the third, Poos *Budee Dooj*, the fourth, Poos *Budee Teej*, and so on.

The Hyree months are not constructed on astronomical principles. The month commences from the evening on which, (the day with the Mahomedans commencing at sun set) the new moon is seen. The duration of the month therefore depends on the state of the atmosphere, and may vary in different places not far distant. No month can contain less than 29 or more than 30, days e.g. if the new moon be seen on the evening of Sunday the 29th of Mohurram, the next day, Monday, will be the 1st day of Suffer. Should the heavens be cloudy and no moon be seen on Sunday evening Monday will be the 30th of Mohurram, and Tuesday

---

* Fuslee	1st Poos	2nd Poos	3rd Poos	4th Poos
Til'h	1	3	4	6
Sambut	Poos B Purwa	Poos B Teej	Poos B Chouthee	Poos B Punchamee

  

† Fuslee	1st Poos	2nd Poos	3rd Poos	4th Poos
Til'h	1		2	3
Sambut	Poos B Purwa	Poos B Purwa	Poos B Dooj	Poos B Teej

the 1st of Suffer. In deeds, therefore, dated by the Mahomedan year, the day of the week should also be inserted.

The following are the names of the months of the Hijree year

1 Mohurram	7 Rajab
2 Suffer	8 Shaban.
3 Rubbee ool Awul.	9 Rumzaan
4 Rubbee oos Sance, or ool Akhir.	10 Shuwal
5 Jumadee ool Awul	11 Zilkadee
6 Jumadee oos Sance, or ool Akhir	12 Zilhijeh.

Under the dynasty of the Moghul Emperors, the year of the reigning Sovereign was usually inscribed in documents of a public nature. The year commenced from the accession of the Sovereign, and is called the year of the Juloos (reign). In the tables, the sixth year of the Juloos of Shah Alum commenced on the first of Jumadee ool Awul, 1178, Hijree, or Wednesday, 31st. October, A. D 1764. The first year of the Juloos of Acher Shah Sance commenced on the 6th of Rumzaan, 1221; Hijree, Tuesday, 18th November, A. D 1806.

For a more full account of the Native Eras, see *Gilchrist's Hindoostanee Philology*, vol. III. page 301

\* In this lunar year there occur two intercalary months and one month is expunged from the Calendar, owing to the principles for the formation of the lunar year, from the position of the moons in regard to the solar year. The expunged month embraces the second or Soodee half of Ughun and the first or Dudes of Poos.

## P R E F A C E.

---

*The following work shows the corresponding dates in different Eras prevailing throughout India, embracing the period between A. D. 1842 and the present time. It is a republication, with revisions and alterations, of the Chronological tables issued yearly by the Government, which are now out of print and very scarce. The compiler has spared no pains to secure accuracy, and trusts that his pages will be found of use not only to members of the legal profession but to all classes of the community.*

W. A. B.

# INTRODUCTION

TO THE

## CHRONOLOGICAL TABLES.

TAKEN FROM THE GOVERNMENT ALMANAC.

---

THE following Tables, compiled from the manuscript originals in the Register's Office of the Sudder Dewanny Adawlut at Calcutta, are published under the authority of Government. They will be found extensively useful to the Officers of Government, Merchants, Indigo-planters, and others, who have dealings with the natives of the country, in comparing the corresponding dates of the several eras current in the provinces of Bengal, Behar, Orissa, and Benares, and in the ceded and conquered provinces; and in ascertaining the correctness of law papers and other documents, which are frequently fraudulently altered in one or more of their dates, with a view to adopt them to the substantiation of a desired fact, or to negative their value or importance, as the case may be.

In Bengal, the Bengalee year, where no specific mention of another era is made, is understood to be intended, in Orissa, the Willaity. They are used respectively in the collection of the Government revenue, and in transactions between individuals, in those provinces.

The Fuslee and Sumbut years are, in like manner, current in the provinces of Behar and Benares, and in the ceded and conquered provinces. The Government revenue is collected by the Fuslee year, and the Common transactions of life are, as regards the period of their occurrence, regulated by it. The Sumbut year is chiefly used by native merchants and bankers.

The Hijree year obtains, generally, throughout the provinces, in a greater or less degree, as the local community may or may not consist of Mahomedans; to transactions amongst whom it may be said to be exclusively confined.

The Bengalee and Willaity are solar; the Fuslee and Sumbut, lunar years, and the calculations, in all, accord with the principles of the Hindoo Astronomy. The days of the month of the three first-mentioned styles are,

reckoned in consecutive order; so that the first day being found in the tables, the subsequent dates can be easily ascertained. In the Sumbut, however, the date cannot be ascertained if not given in the tables, in consequence of dates being expunged and repeated, as will be hereafter explained.

The Hindoo solar year consists of 365 days, 6 hours, 12 minutes, and 9 seconds, and is divided into 12 months, each commencing from the moment the sun enters a new sign of the zodiac. The following table shows how far the months coincide with the English months, and the sign of the zodiac in which the sun is during each month.

1 Bysakh,	April,	May	Mek h,	Aries
2 Jyot,	May,	June	Brik h,	Taurus.
3 Assar,	June,	July	Mit hōōn,	Gemini
4 Sawun,	July	August	Kurk,	Cancer
5 Bhadoon,	August,	September	S ng	Leo.
6 Assun or Kuwar,	September,	October	K tnyya,	Virgo.
7 Kartick,	October	November	Toola,	Libra
8 Ughun,	November,	December	Brachik,	Scorpio
9 Poes	December,	January	D hun,	Sagittarius.
10 Magh,	January	February	Mukur,	Capricornus.
11 Ph goon,	February,	March	Kōōmb h,	Aquarius.
12 Chyt,	March,	April	Meen,	Pisces

Corresponding with the last part of

and the first part of

The sun is in the sign of the Hindoo zodiac

Corresponding with the Latin signs

The Bengalee year commences on the 1st of Bysakh, the Willaity on the 1st of Assun.

The Hindoo lunar year is shorter than the solar by 10 days, 21 hours, 23 minutes and 12 seconds. This difference in two solar years eight months and 15 days amounts to one month. In the year in which it attains to this, viz that in which two conjunctions occur while the sun is in the same sign, the second month is called by the same name as the preceding and is denominated *Lound*, or *Udhar*, or intercalary. No religious festivals occur in this month. The intercalations occur from Chyt to Assun, both inclusive.

The Fuslee year commences on the 1st of Assun, (called also in the Western Provinces Kuwar) \* The Sumbut year, with the first day of the *Sooder Puk h*, or second or bright semi lunation of Chyt.

The Fuslee and Sumbut months correspond in name and duration of time, and commencing on the day after the full moon, extend to the full moon following. The days of the Fuslee month are reckoned, as before stated, in consecutive order those of the Sumbut are governed by the following principles.

The month is divided into 30 equal parts or *Tiths* and again into two *Puk h*s, or semi lunations each consisting of 15 *Tiths*. The first semi-lunation commencing on the day after the full moon (*Poorunmashee*) ends with the new moon (*Umatrus*), and is called the *Budee Puk h*, or dark

semi-lunation: the second commences on the day after the *Umavatu*, and ends with the *Poorunmashee*, and is denominated the *Sooder Puk'h*, or bright semi-lunation.

The civil or Fuslee month consists of from 28 to 30 days: The *Tit'h*s, therefore, of a month of 30 days will be, each, longer\* than those of a month of 28 or 29 days; and, as the Fuslee day embraces the period between sun-rise and sun-rise, a day will occasionally occur in which two *Tit'h*s will expire. Sometimes again no *Tit'h* will expire during the course of the day. In the first instance, the second *Tit'h* will be expunged; the day invariably taking its name from the first *Tit'h* which ends during the course of it: *e. g.* the first *Tit'h* expires just after sun-rise of the first day of Poos Fuslee; the second, before sun-rise of the second day of Poos Fuslee; the third, during the course of the second of Poos Fuslee: then† the first day of Poos Fuslee will be called Poos *Budee Purwa*; the second Poos Fuslee, Poos *Budee Teej* (the second *Tit'h* being expunged); the third Poos Fuslee, Poos *Budee Chouthee*, and so on. In the second instance, the day in which no *Tit'h* expires will be called by the same number as the preceding day: *e. g.* the first *Tit'h* expires about the close of the first, or exactly at, or a little before sun-rise of the second Fuslee day; and the second, just after sun-rise of the third Fuslee day; then‡ the first Fuslee day will be denominated Poos *Budee Purwa*, the second, also Poos *Budee Purwa*; the third, Poos *Budee Dooj*; the fourth, Poos *Budee Teej*; and so on.

The Hijree months are not constructed on astronomical principles. The month commences from the evening on which, (the day with the Mahomedans commencing at sun-set) the new moon is seen. The duration of the month therefore depends on the state of the atmosphere, and may vary in different places not far distant. No month can contain less than 29, or more than 30, days: *e. g.* if the new moon be seen on the evening of

\* The Fuslee and Sumbut months correspond in duration of time and Sumbut months is 30 *Tit'h*s

∴ Fuslee month of 28 days is a month of 30 *Tit'h*s i. e. 1 *Tit'h* =  $\frac{28}{30}$  day Fuslee.

Sunday the 29th of Mohurram, the next day, Monday, will be the 1st day of Suffer. Should the heavens be cloudy, and no moon be seen on Sunday evening, Monday will be the 30th of Mohurram, and Tuesday, the 1st of Suffer. In deeds, therefore, dated by the Mahomedan year, the day of the week should also be inserted.

The following are the names of the months of the Hyree year :

1 Mohurram.	7 Rujub
2 Suffer.	8 Shabrin
3 Rubbee ool Awul.	9 Rumzaan.
4 Rubbee oos Sance, or ool Akhir.	10 Shuwal.
5 Jumadee ool Awul	11 Zilkadeh
6 Jumadee oos Sance, or ool Akhir.	12 Zilajeh.

Under the dynasty of the Mogul Emperors, the year of the reigning Sovereign was usually inscribed in documents of a public nature. The year commenced from the accession of the Sovereign, and is called the year of the Juloos (reign). In the tables, the sixth year of the Juloos of Shah Alum commenced on the first of Jumadee ool Awul, 1178, Hyree, or Wednesday, 31st October, A. D 1764. The first year of the Juloos of 'Acher Shah Sance commenced on the 6th of Rumzaan, 1221, Hyree, Tuesday, 18th November, A. D. 1806.

For a more full account of the Native *Æras*, see Gilchrist's *Hindoostance Philology*, vol. III. page 301.
